154 Local Plan Update

Carolyn Williams, Central Lancashire Local Plan Co-Ordinator, submitted a report on the Central Lancashire Local Plan.

An update was given on the progress of the Local Plan informing the Committee that the failure to recruit to the vacant posts, and home teams also being stretched due to demands on officer time in dealing with planning appeals, had impacted on the Local Plan work and progress had been slowed. Temporary agency support for one officer had been extended until end of April 2022, and officers are continuing to look at potential routes to bring in additional consultancy support.

Committee were informed that officers are awaiting the release of a number of key documents being led by LCC to inform the Greater Lancashire Plan (GLP) which cover economy and the environment. The Economic work had been published, and officers have already been utilising aspects of this evidence through the update to the Employment Land Study and the work DLP Planning had been commissioned to undertake on housing. Councillors asked that the Economic report be attached to the minutes (please see below). <https://www.lancashireier.org/reports/>

Officers are still looking at options for delivering the Preferred Option consultation, to enable all the evidence base work needed for that to be in place. As part of this officers had been looking at how to deliver the next stage to enable the information to get out there as soon as it is ready, whilst ensuring a robust and transparent process to preparing the plan is undertaken. Unfortunately this does mean that consultation on this stage is delayed, but it is felt it is necessary for the above reasons. Actual dates for the consultation will be provided following completion of work to update the LDS.

Other issues discussed and detailed in the report related to the following: -

- SHEELA
- Preferred Options
- Strategic Flood Risk Assessment (SFRA)
- Housing Evidence
- Central Lancashire Density Study
- Central Lancashire Transport Masterplan
- Central Lancashire Landuse Study
